# Registracija autentikacijskih metoda

## Implementacija MFA i SSPR

## Sadržaj

Sadržaj.....	2
1. Uvod .....	3
2. Registracija Microsoft Authenticator metode .....	3
3. Registracija Email metode.....	7

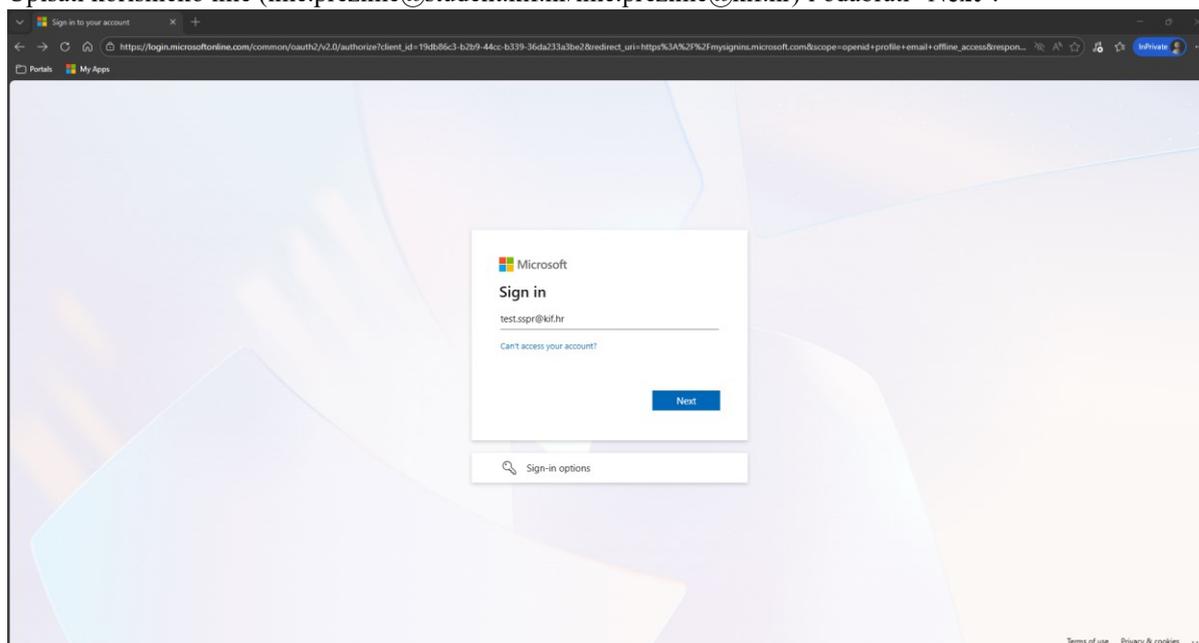

## 1. Uvod

Svrha ovog dokumenta je opisati proces registracije autentikacijskih metoda za SSPR (Self-service Password Reset) i MFA (Multi-factor Authentication).

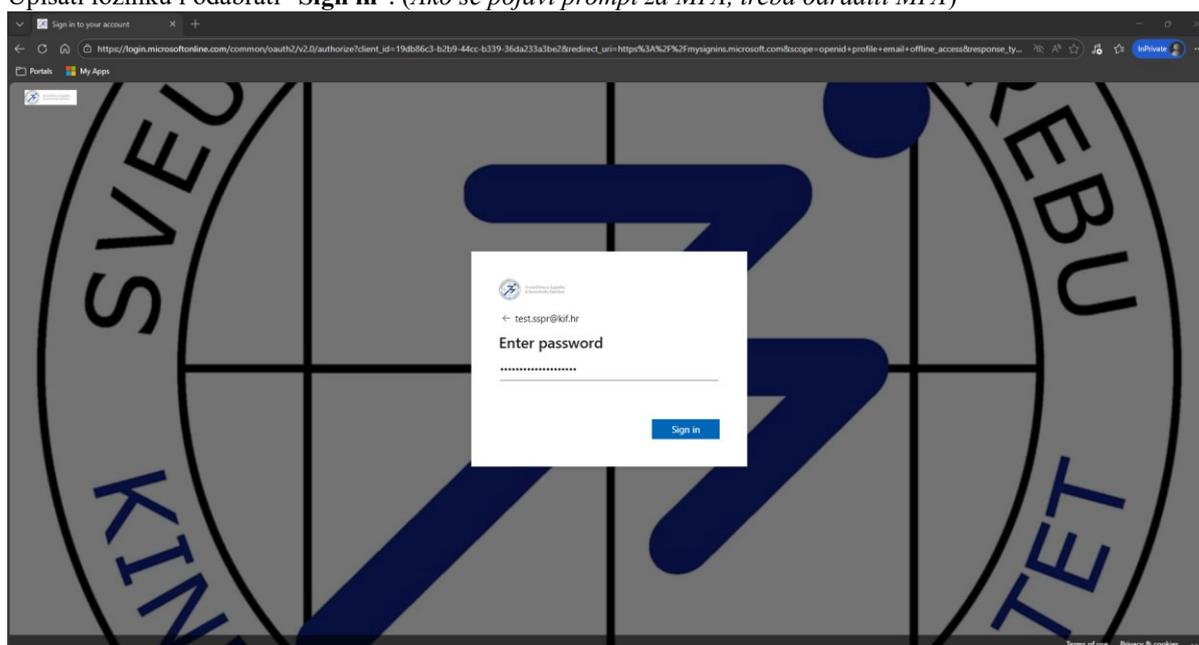

## 2. Registracija Microsoft Authenticator metode

Korisnik koji želi dodati "Microsoft Authenticator" kao autentikacijsku metodu treba odraditi sljedeće:

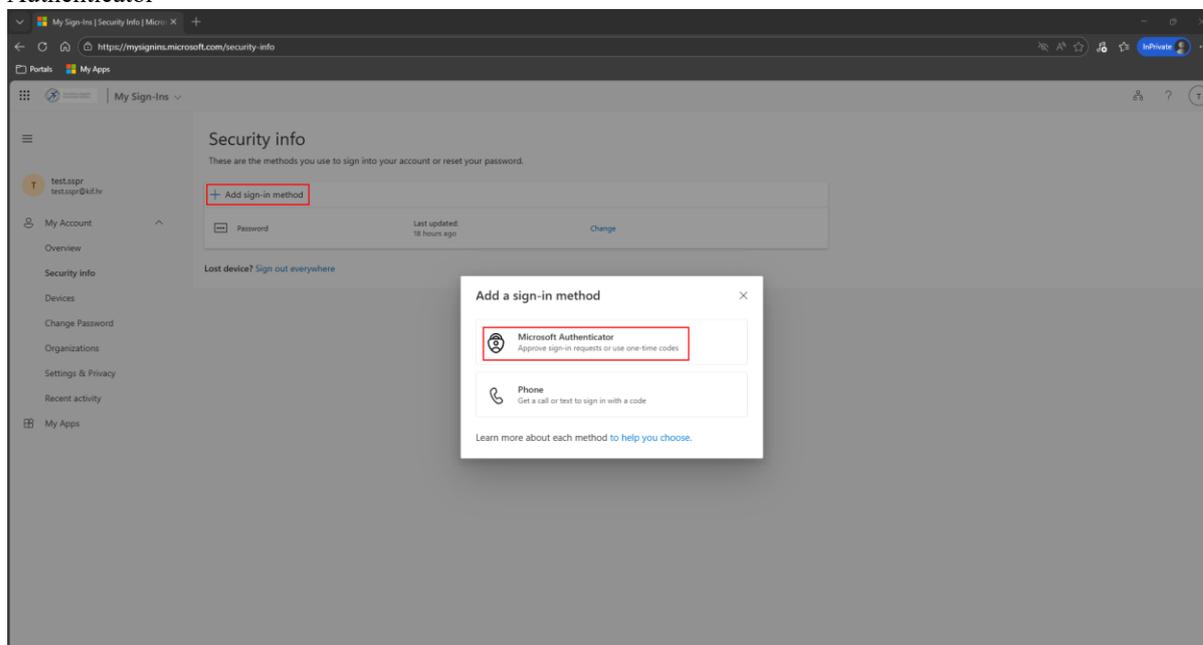

- 2.1 Otvoriti web browser i otići na <https://aka.ms/ssprsetup> stranicu.
- 2.2 Upisati korisničko ime (ime.prezime@student.kif.hr/ime.prezime@kif.hr) i odabrati "Next".

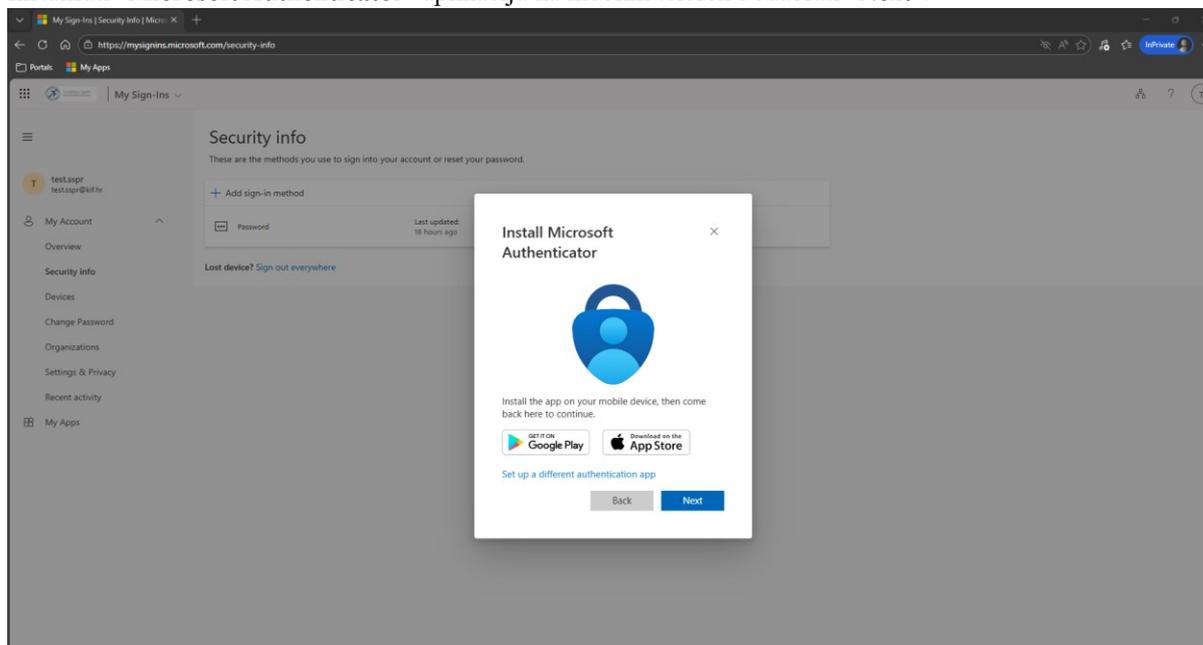

- 2.3 Upisati lozinku i odabrati "Sign in". (Ako se pojavi prompt za MFA, treba odraditi MFA)

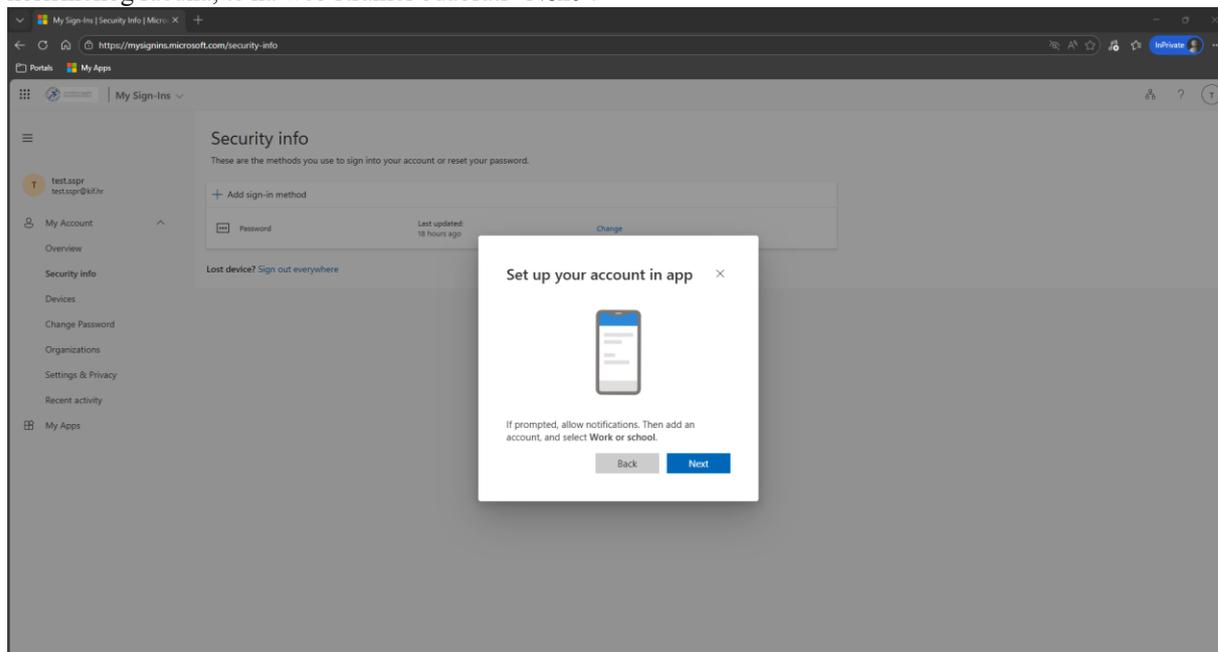

## 2.4 Na "Security info" stranici odabrati "+ Add sign-in method", te na pop-up prozoru odabrati "Microsoft Authenticator"

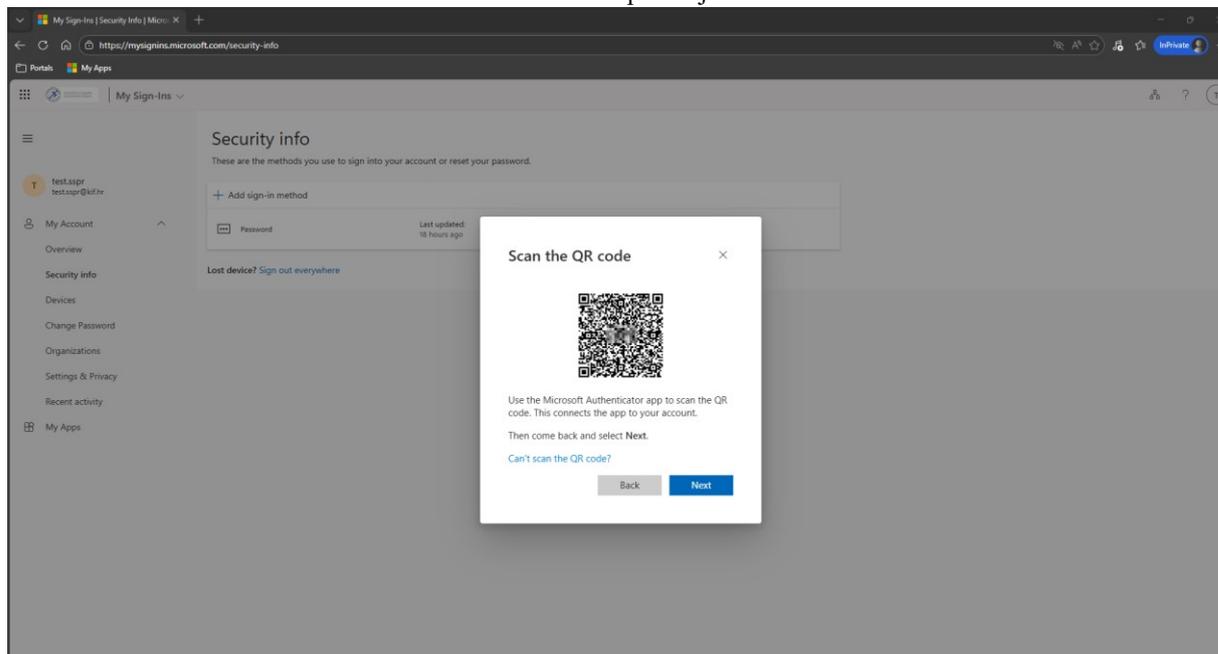

## 2.5 Instalirati "Microsoft Authenticator" aplikaciju na mobilni telefon i odabrati "Next".

2.6 U "Microsoft Authenticator" aplikaciji odabrati "+" i "Work or school account" za dodavanje novog korisničkog računa, te na web stranici odabrati "Next".

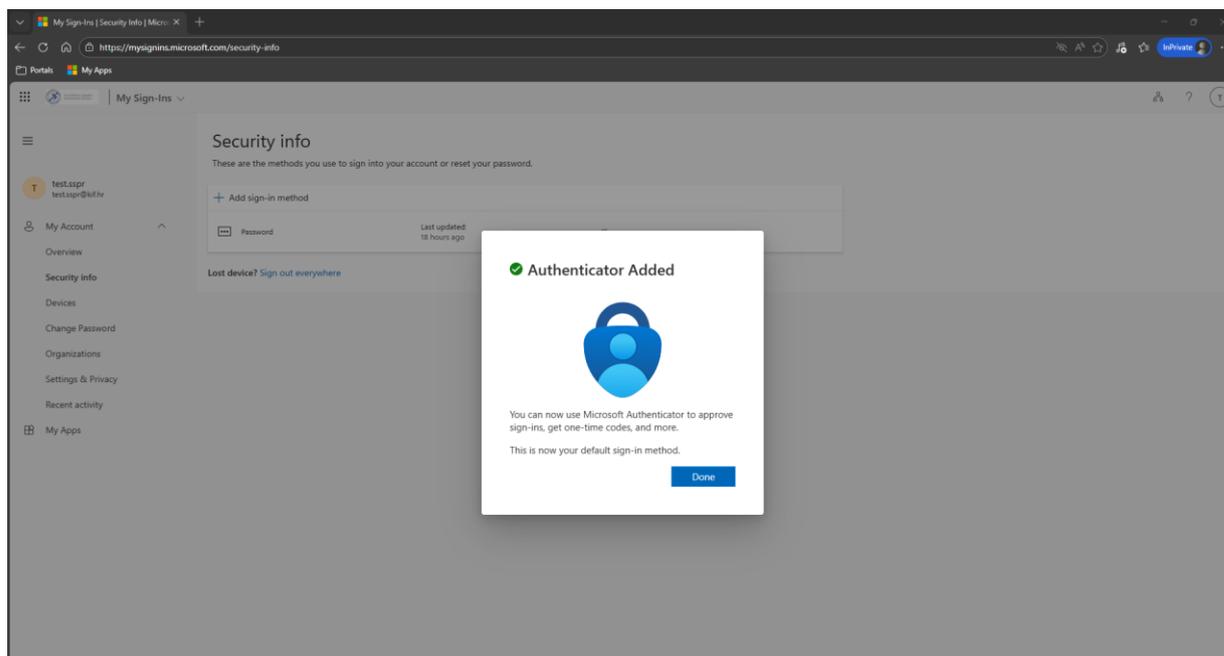

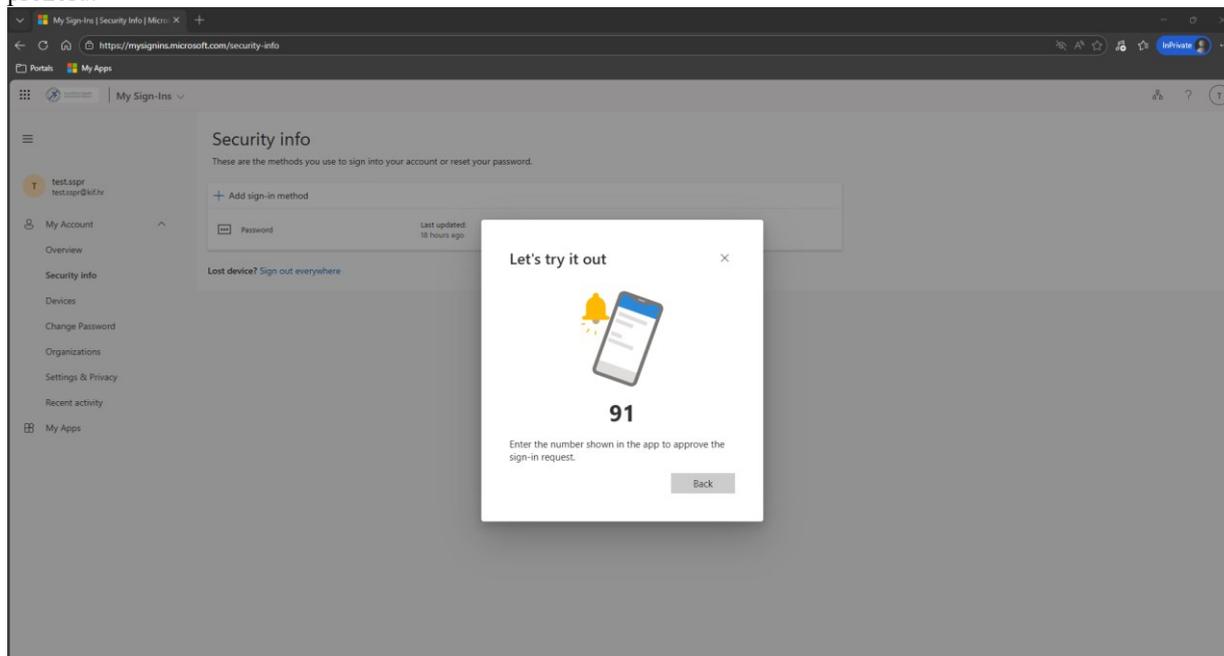

2.7 U mobilnoj aplikaciji odabrati "Scan a QR code" i skenirati QR code prikazan na web stranici. Novi korisnički račun bi trebao biti dodan u "Microsoft Authenticator" aplikaciju. Odabrati "Next" na web stranici.

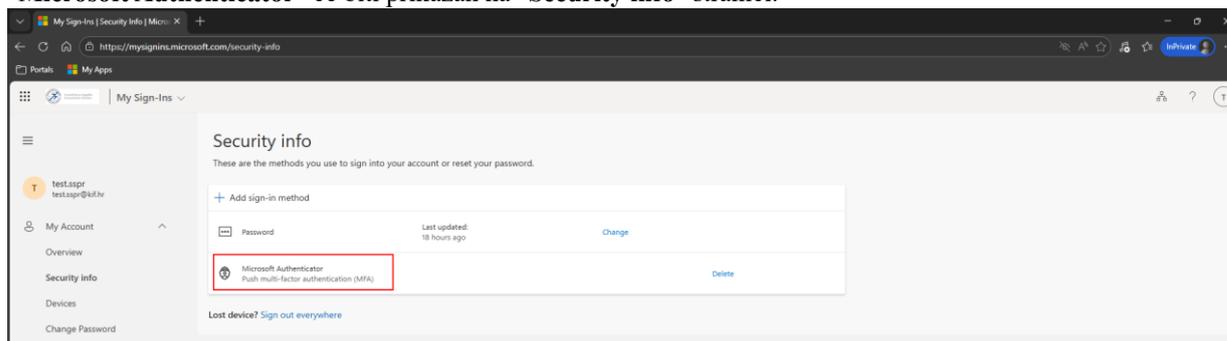

2.8 U mobilnoj aplikaciji upisati broj prikazan na web stranici. Odabrati "Done" na "Authenticator Added" pop-up prozoru.

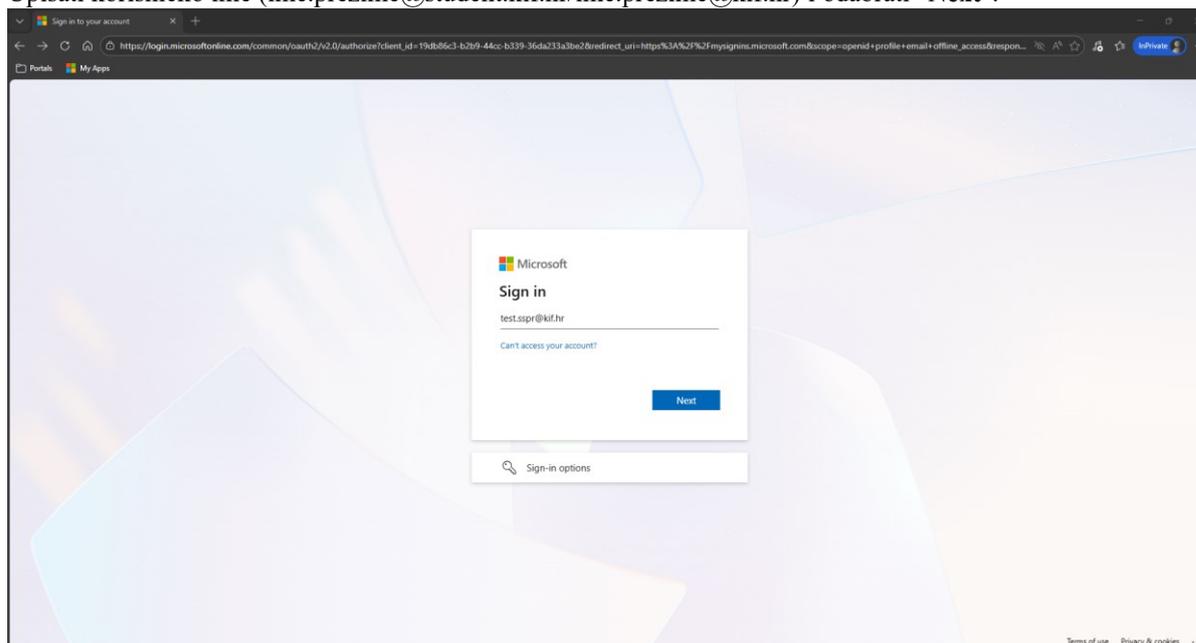

## 2.9 "Microsoft Authenticator" će biti prikazan na "Security info" stranici.

## 3. Registracija Email metode

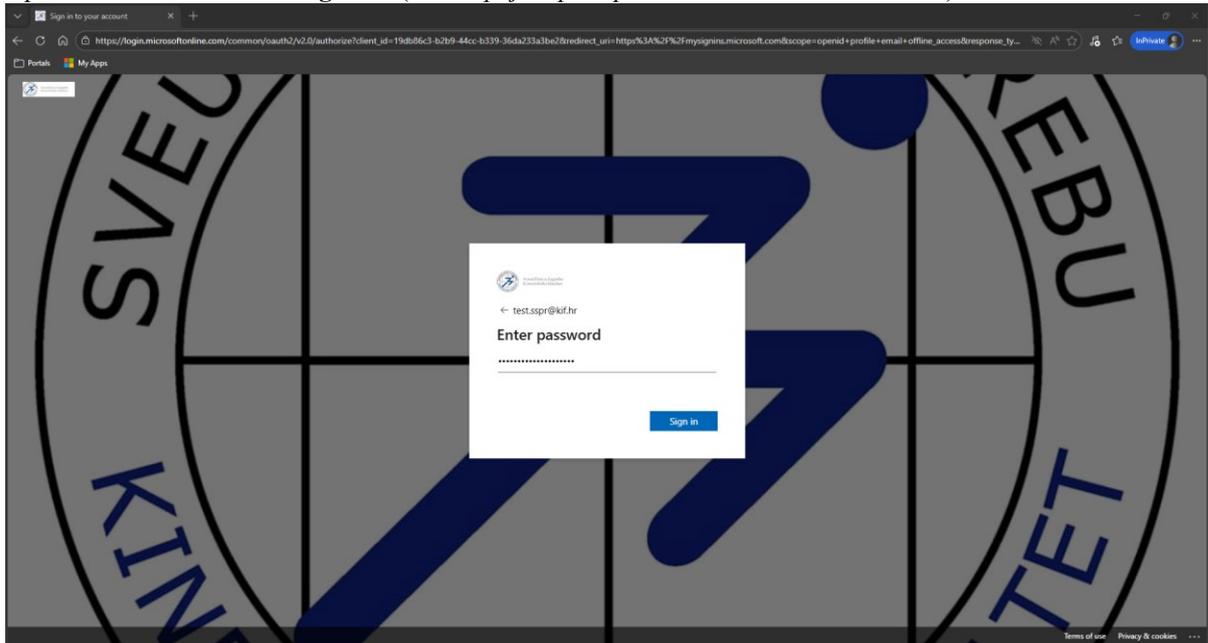

Email metoda se ne može koristiti kao MFA metoda, međutim može se iskoristiti kao dodatna metoda kod resetiranja ili promjene lozinke. Korisnik koji želi dodati "Email" kao autentikacijsku metodu treba odraditi slijedeće:

- 3.1 Otvoriti web browser i otići na <https://aka.ms/ssprsetup> stranicu.
- 3.2 Upisati korisničko ime (ime.prezime@student.kif.hr/ime.prezime@kif.hr) i odabrati "Next".

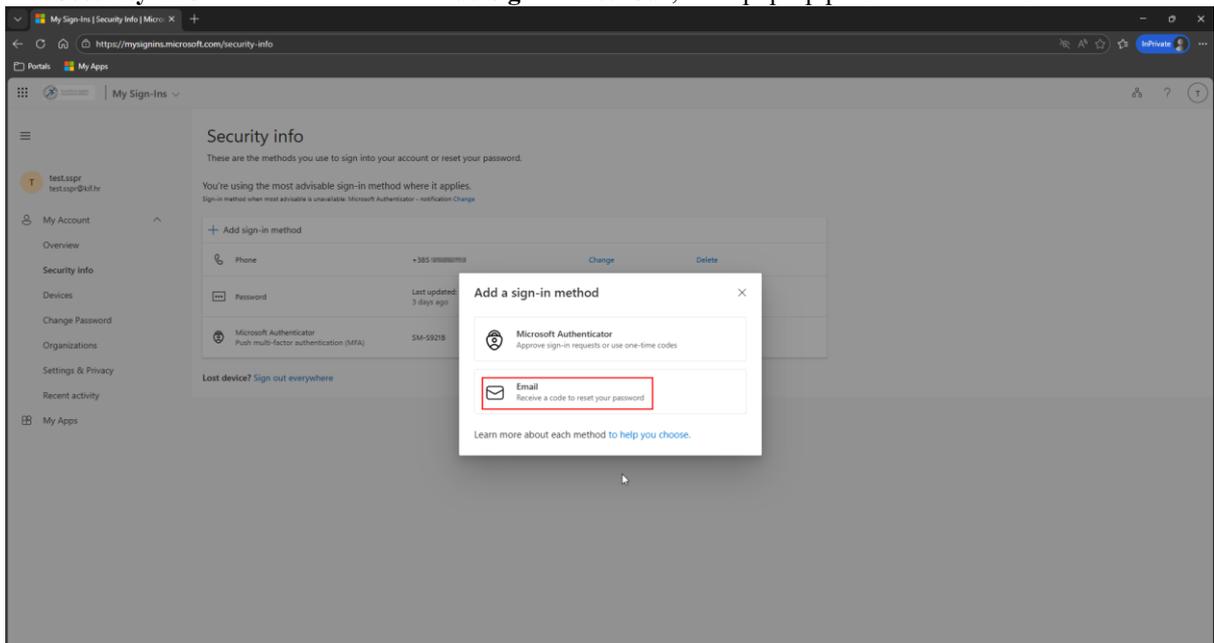

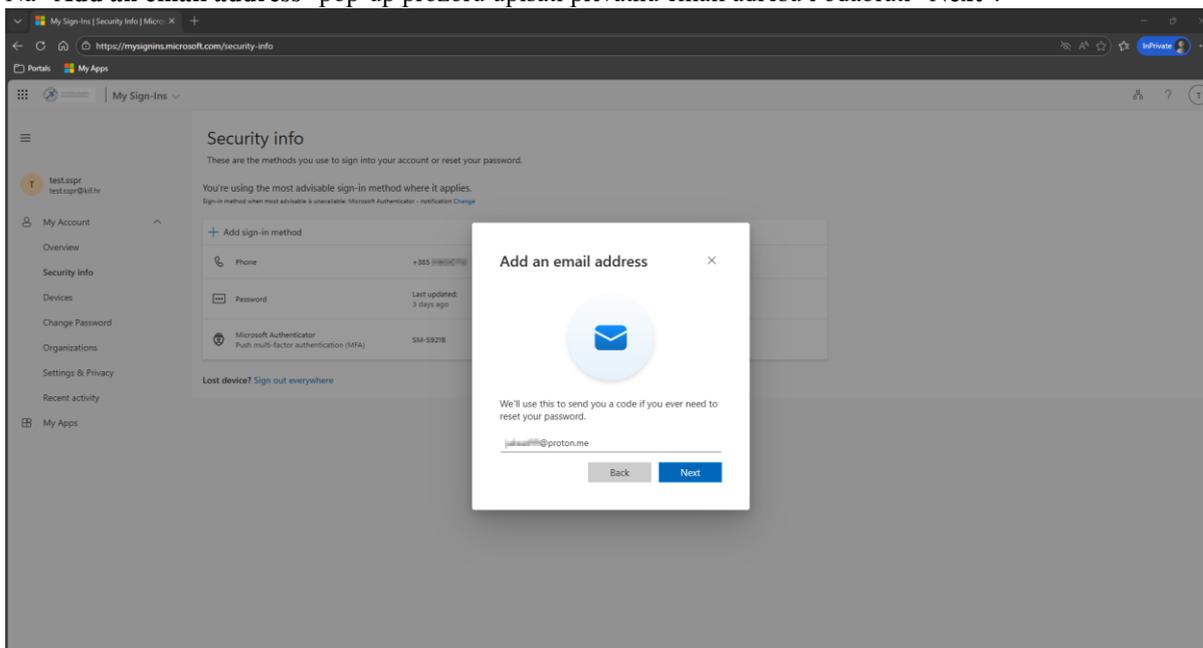

### 3.3 Upisati lozinku i odabrati "Sign in". (Ako se pojavi prompt za MFA, treba odraditi MFA)

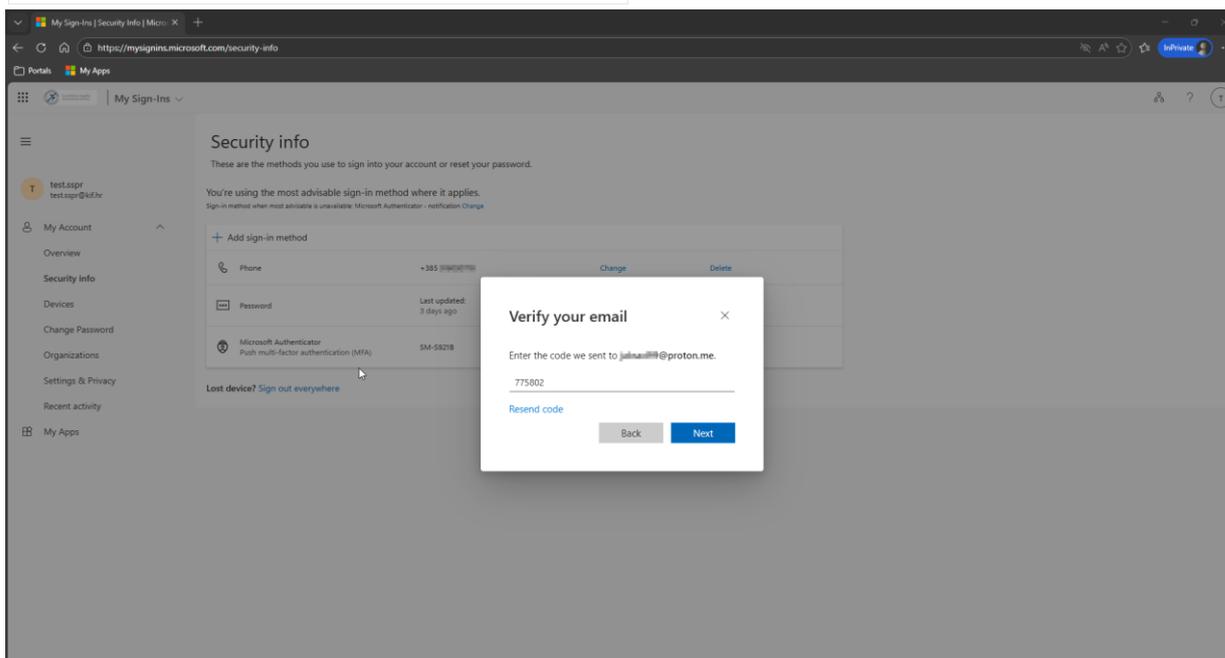

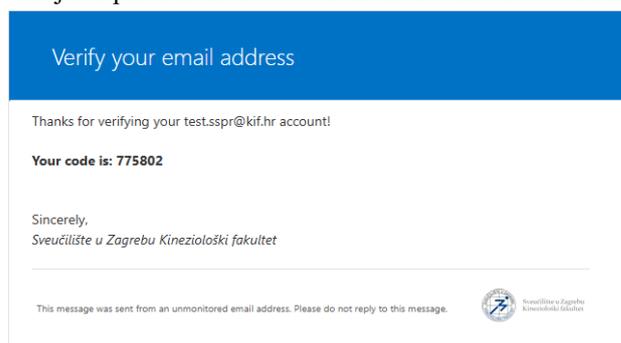

### 3.4 Na "Security info" stranici odabrati "+ Add sign-in method", te na pop-up prozoru odabrati "Email"

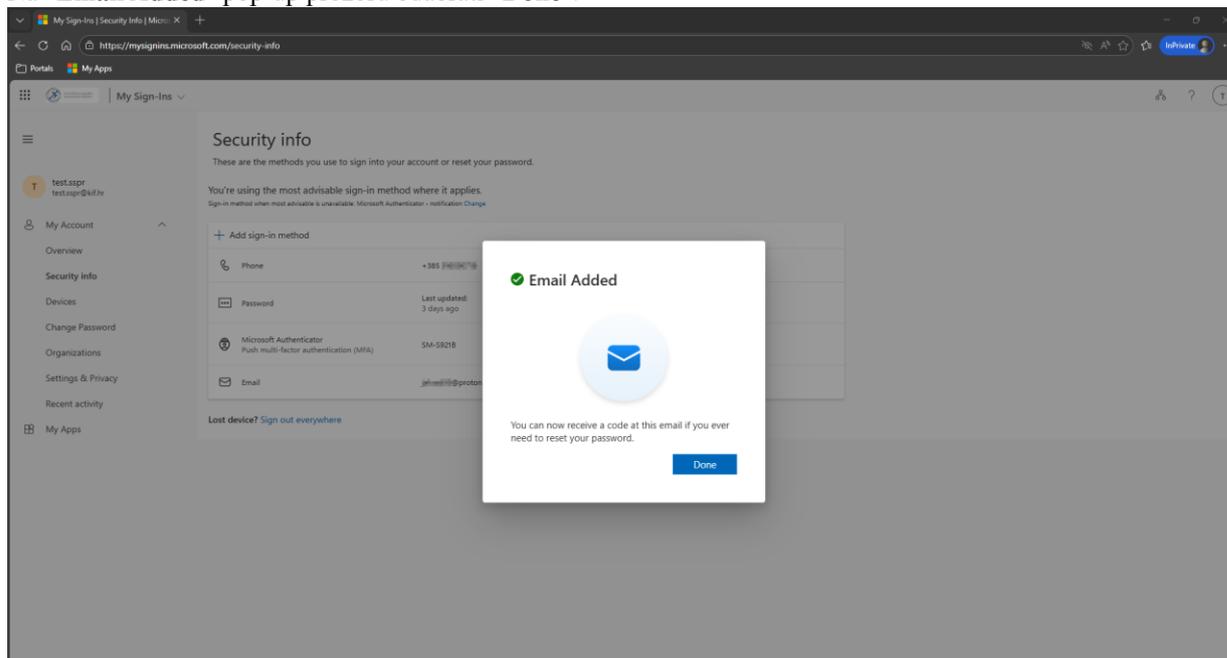

### 3.5 Na "Add an email address" pop-up prozoru upisati privatnu email adresu i odabrati "Next".

Provjeriti privatni mailbox te numeričku šifru dobivenu na mail upisati i odabrati "Next".

### 3.6 Na "Email Added" pop-up prozoru odabrati "Done".

### 3.7 "Email" metoda će biti prikazana na "Security info" stranici.
